PROFESSIONAL SUMMARY

Full-stack developer who builds and ships complete web applications with Next.js, React, TypeScript and Supabase (PostgreSQL). Built a school platform covering student results, timed online exams, assignments and an admin portal for 14 classes (Creche to SSS 3), and an AI-powered CV analysis app using the Gemini API. Strong on secure sign-in, database functions and deployment on Vercel. Seeking a remote full-stack or front-end role.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3, SQL

Frontend: React, Next.js (App Router), Tailwind CSS, Bootstrap

Backend & APIs: Node.js, Next.js API routes, REST APIs, PostgreSQL functions, file uploads

Database & Auth: Supabase (PostgreSQL, Row Level Security), hashed PIN/password sign-in, Excel (xlsx) import/export

AI & Tools: Gemini API, Git, GitHub, Vercel, Netlify

EXPERIENCE

Independent Full-Stack Developer 2024 – Present

- Design, build and deploy full-stack web applications with Next.js, React, TypeScript, Tailwind CSS, Node.js and Supabase.
- Built and run a school platform for De Kings Perfection Private School serving 14 classes (Creche to SSS 3) using Next.js, React, TypeScript and Supabase, replacing a manual Google Sheets process.
- Reduced term result compilation time by ~97% (from ~72 hours to 2 hours) by automating totals, averages, and grade calculations via multi-tab Excel workbook uploads.
- Integrated instant automated marking for online tests and exams with server-enforced deadlines, hashed PIN logins, and a 5-attempt lockout security rule.
- Built CVCommit, an AI-powered CV analysis platform that uses the Gemini API to score resumes and suggest improvements.
- Write secure server-side logic and PostgreSQL functions, integrate REST APIs, and deploy with Git/GitHub and Vercel.

PROJECTS

CVCommit: AI-Powered CV Analysis Platform

Next.js · TypeScript · React · Tailwind CSS · Gemini API · Supabase

Live demo · GitHub

- Analyses CVs across six hiring criteria, giving an overall score and clear recommendations to improve.
- Handles PDF and DOCX upload, text extraction and validation, then Gemini-powered analysis through Next.js API routes; CV fingerprinting and caching speed up repeat checks.
- Built a CV improvement workflow with Supabase for data storage.

De Kings Perfection Private School: Results, Online Exams & Admin Portal

Next.js · React · TypeScript · Supabase (PostgreSQL) · Vercel

Live demo · GitHub

- Replaced the school's Google Sheets result process: Login ID and hashed PIN sign-in, failed-login lockout, results by term, and printable report cards.
- Built a computer-based testing system: timed tests and exams, autosaved answers, one attempt per student, server-enforced deadlines, automatic marking and random question order; correct answers never reach the browser.
- Built an admin portal to add students in bulk with login credentials, import scores from Excel (one tab per class), publish results with automatic totals, averages and grades, and manage terms, tests and assignments.
- Added a student dashboard with one sign-in for results, tests and assignments, including JPG, PNG and PDF uploads to private storage and teacher marking.

EDUCATION

Yaba College of Technology (YABATECH), Lagos, Nigeria 2026 – Present

Higher National Diploma (HND), Civil Engineering

Yaba College of Technology (YABATECH), Lagos, Nigeria 2023 – 2025

National Diploma (ND), Civil Engineering
